(IT) Raccomandazioni per l'uso e la manutenzione

Uso e manutenzione ordinaria: si raccomanda di effettuare una pulizia regolare delle superfici vetrate e dei profili mediante detergenti neutri, evitando prodotti aggressivi o abrasivi che possano comprometterne l'integrità. Programmare controlli periodici verificando l'assenza di allentamenti e lo stato delle guarnizioni e dei drenaggi, per assicurare la durabilità del sistema, la prevenzione di ristagni e infiltrazioni.

Manutenzione straordinaria: per la rimozione e sostituzione di lastre installate, le operazioni di smontaggio possono essere condotte seguendo, in ordine inverso, la sequenza per l'installazione. Per installare le nuove lastre, riconfigurare i morsetti nella posizione originale e ripetere la sequenza di montaggio. Qualora non siano riscontrabili danni ai componenti del sistema DEFENDER (usura anomala o compromissioni funzionali), non sussistono limitazioni al loro riutilizzo per l'installazione di una nuova lastra, purché le condizioni di integrità e prestazione risultino conformi a quelli dei componenti originali.

(EN) Recommendations for use and maintenance

Use and ordinary maintenance: it is recommended to carry out regular cleaning of the glazed surfaces and profiles using neutral detergents, avoiding aggressive or abrasive products that could compromise their integrity. Schedule periodic inspections to verify the absence of loosening and regularly check the condition of the gaskets and the drainage systems, to ensure the durability of the system and to prevent water stagnation and infiltrations.

Extraordinary maintenance: for the removal and replacement of installed panes, the disassembly operations may be carried out by following, in reverse order, the sequence used for installation. To install the new panes, reposition the clamps in their original configuration and repeat the assembly sequence. If no damage, abnormal wear, or functional impairments are found on the components of the DEFENDER system, no limitations apply to their reuse for the installation of a new pane, provided that their integrity and performance conditions remain consistent with those of the original components.

(FR) Recommandations pour l'usage et la maintenance

Usage et maintenance ordinaire : il est recommandé d'effectuer un nettoyage régulier des surfaces vitrées et des profils à l'aide de détergents neutres, en évitant les produits agressifs ou abrasifs susceptibles d'en compromettre l'intégrité. Programmer des contrôles périodiques afin de vérifier l'absence de desserrages et contrôler régulièrement l'état des joints et des dispositifs de drainage, afin d'assurer la durabilité du système et de prévenir les stagnations d'eau et les infiltrations.

Maintenance extraordinaire : pour la dépose et le remplacement des plaques installées, les opérations de démontage peuvent être effectuées en suivant, dans l'ordre inverse, la séquence prévue pour l'installation. Pour installer les nouvelles plaques, reconfigurer les pinces dans leur position d'origine et répéter la séquence de montage. Si aucun dommage, usure anormale ou altération fonctionnelle n'est constaté sur les composants du système DEFENDER, aucune limitation ne s'applique à leur réutilisation pour l'installation d'une nouvelle plaque, à condition que leurs conditions d'intégrité et de performance soient conformes à celles des composants d'origine.
