SAINT-GOBAIN

SINCE 1989

## A PASSION BORN FROM GLASS

For over 30 years we addressed the needs of glassworks, installers and designers offering cutting-edge solutions, always taking care of comfort, safety and especially design. Logli Massimo's products represent, today more than yesterday, highly technological solutions: durable, reliable and high-quality.

# INNOVATION AND RESEARCH:

## **THE TECHNICAL OFFICE AND THE TEST LABORATORY**

All our highly technological solutions are able to anticipate and address the needs of glassworks, installers, designers, interior decorators. Not only that: thanks to our laboratory and a specialised engineering team, we design and produce entirely customised solutions. The skills and expertise of our professional staff allow us to provide a high level technical consultancy and to hold training courses for our customers.

Since 2010 the company has been working in close synergy with several universities and research institutes for the creation and the constant improvement of an internal testing laboratory. Today, we can count on highly engineered machinery for a series of verification techniques dedicated to glazed structures and fixing accessories. This allows the company to be very quick and efficient for first testing and performance assessment of prototypes and early production samples. Following these internal assessments, tests are then carried out by independent international institutes such as TÜV, CSTB in Paris, LSL in Munich, Politecnico di Milano as assurance of quality for customers.

# CUSTOMIZATION

Customization services like packaging branding, on request items and finishes together with technical assistance are some of our customer care strengths.

**OUR PRODUCT LINES**

# TRUST BEAUTY

Logli Massimo S.p.A. systems ensure the creation of glass balustrades and canopies, combining absolute safety and durability with the aesthetic and practical qualities of glass: transparency, low thickness, ability to blend in with any environment.

## SYSTEMS FOR GLASS BALUSTRADES

@Glass Canopy

# SYSTEMS FOR OUTDOORS

## INVISIBLE SHELTER

Logli Massimo has a wide gamma of canopies which respond to every possible need, whether installation-related, functional or application-related. This can be considered the result of a mix of experience and innovation. These high quality solutions are studied to maximize comfort and the accessibility to the outdoor spaces.

# SYSTEMS FOR GLASS PARTITIONS

## OBSESSED WITH **DESIGN**

The technological systems and functional solutions for glass partitions reconcile aesthetic requirements, versatility and reliability. The series is completed by step supports, point fixings, glass clamps and countless products and accessories: for projects that combine beauty, strength and design.

# SYSTEMS FOR SLIDING DOORS

## EXPRESSIVE MINIMALISM

Aluminium systems for Logli Massimo S.p.A. sliding glass doors are the ideal solution for the installation of single, double or multiple doors, with the possibility of ceiling or wall installation. The door dragging mechanism, a Logli Massimo S.p.A. patent, ensures perfect alignment of sliding doors and fixed glass in the open position.

# SYSTEMS FOR HINGED DOORS

## TESTED AND CERTIFIED **PERFECTION**

The accessories for hinged and pivoting doors, are also designed for heavy duty loads; quality materials and finishes are ideal for solutions featuring high strength and reliability. The products underwent various tests including endurance and corrosion resistance to obtain the TÜV certification.

# SLIDING SYSTEMS FOR SHOWER PARTITIONS

## MODERN **EVOLUTION**

With its clean lines and minimalism, our flat sliding systems for shower partitions combines high aesthetic, durability and perfect functionality.

## ELEGANCE AND **STRENGTH**

Thanks to the absence of visible screws, hinged doors for shower partitions are not only functional, but also stylish elements. Accessories as safety bars, knobs, clamps, locks, pivot-bath hinges, minimal self-adhesive seals complete the portfolio.
